Acknowledgement

I would like to thank Clevered , my mentor Ms. Mani Malhotra, Dr. Ken , my parents , friends and everyone who supported me during this app development journey

The internship gave me the opportunity to learn apply AI and data sciene concepts to a practical problem and turn the idea into an interactive application

About Me

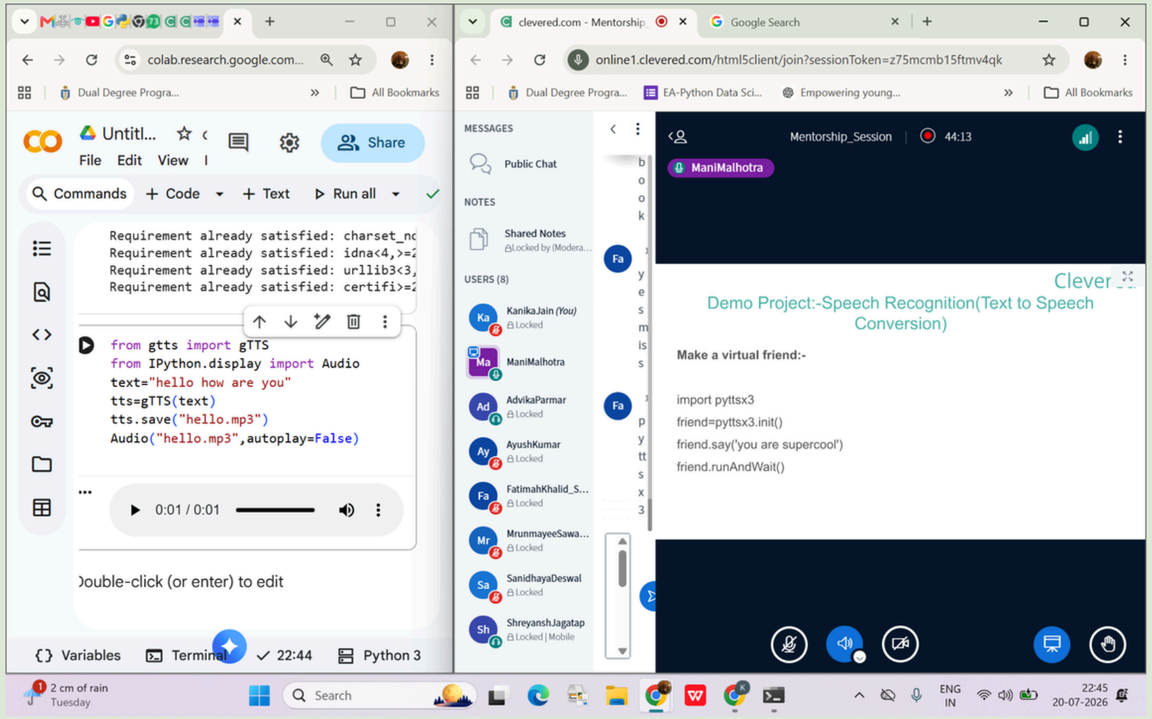

NAME : Kanika Jain

GRADE : XII

AGE : 17

SCHOOL : MKVVIV, Mumbai

About My Internship with Clevered

During my internship with Clevered, I explored different AI and data science concepts through practical projects, including Text-to-Speech, Decision Tree Classifiers, Image Recognition and more. While developing KAYbudget, I was introduced to K-Means Clustering, which I used to identify different spending patterns and create personalised spending profiles.

This internship gave me the opportunity to move from learning AI concepts to applying them in an application of my own.

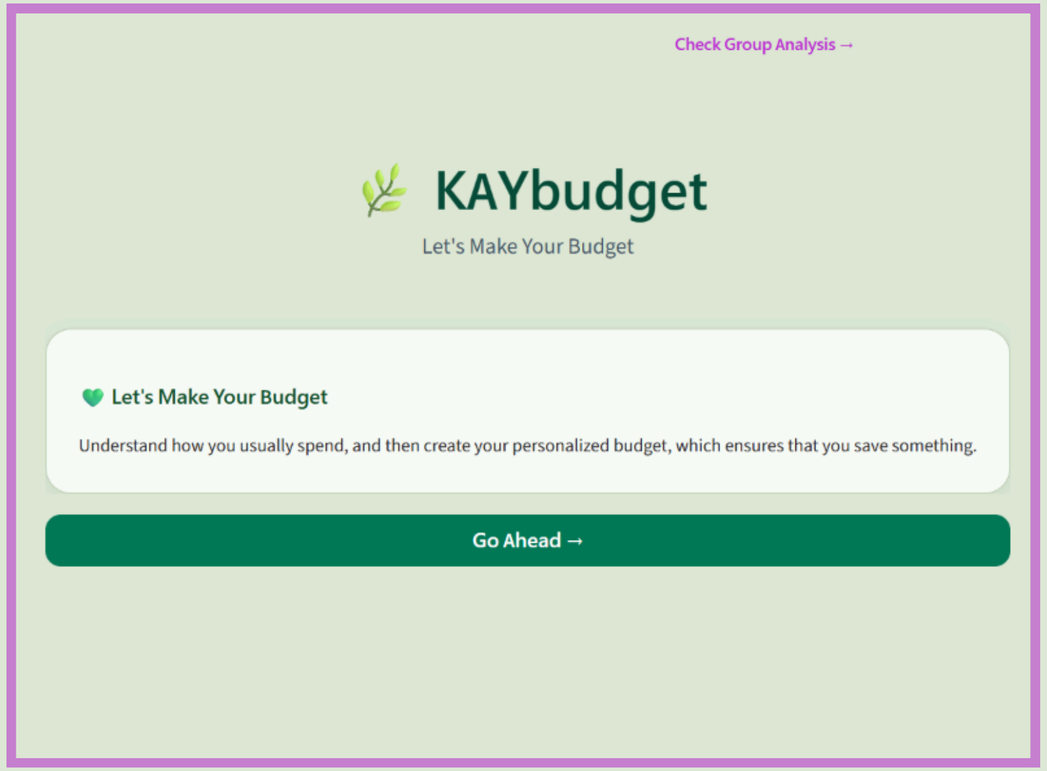

Badges Earned: Rockstar

About KAYbudget

KAYbudget is a budgeting application designed for students.
It helps users plan their monthly money by looking at their usual spending, their current income and their necessary expenses.
The app shows the user's spending style and then provides a monthly budget with recommended savings and suggested discretionary spending.

Main Menu

- Go Ahead → Start creating your budget
- Check Group Analysis → View the survey group analysis

HOW DO I USE THE APP?

1. Enter Your Usual Spending
Tell the app approximately how you usually spend.

2. View Your Spending Style
See the spending profile identified from your entries.

3. Enter This Month's Information
Add your available income and necessary expenses.

4. Create Your Budget
View your recommended savings and discretionary budget.

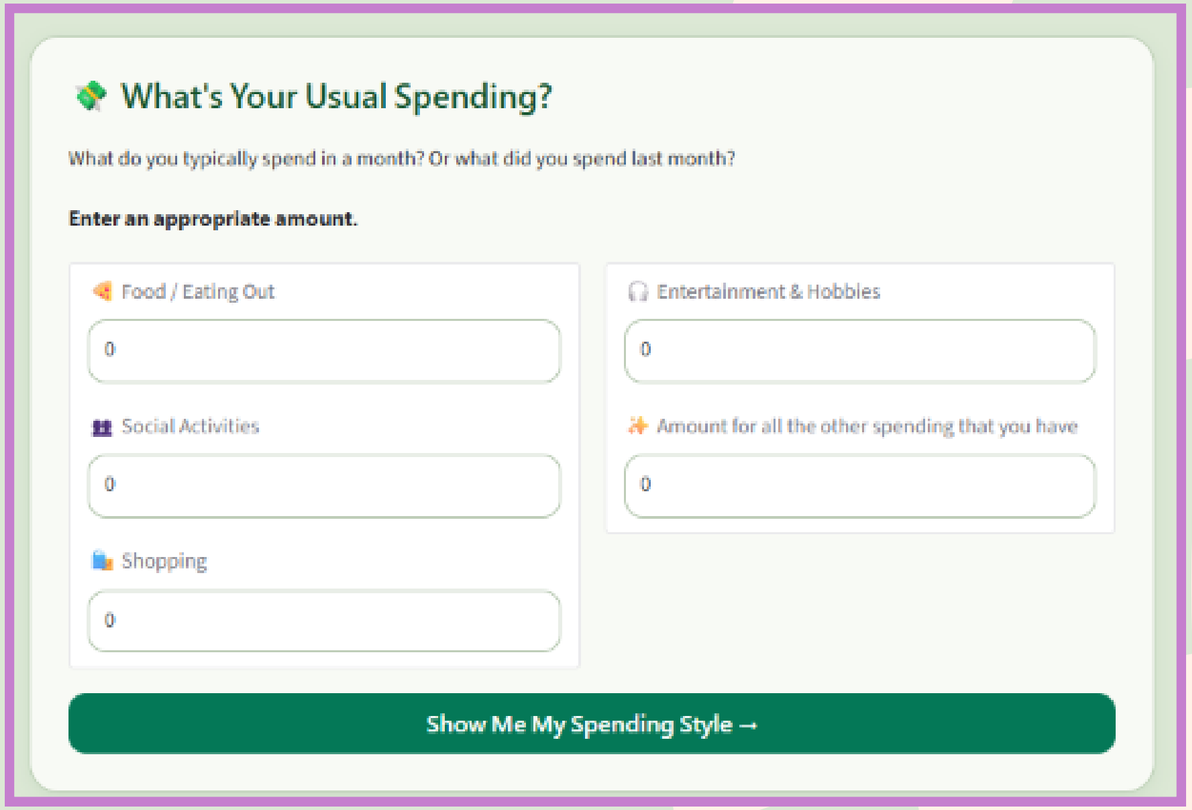

5. View Your Spending Breakdown
See the suggested amount for each discretionary category.

MAKE YOUR BUDGET

This section allows the user to enter an estimate of their usual discretionary spending.

Steps to use

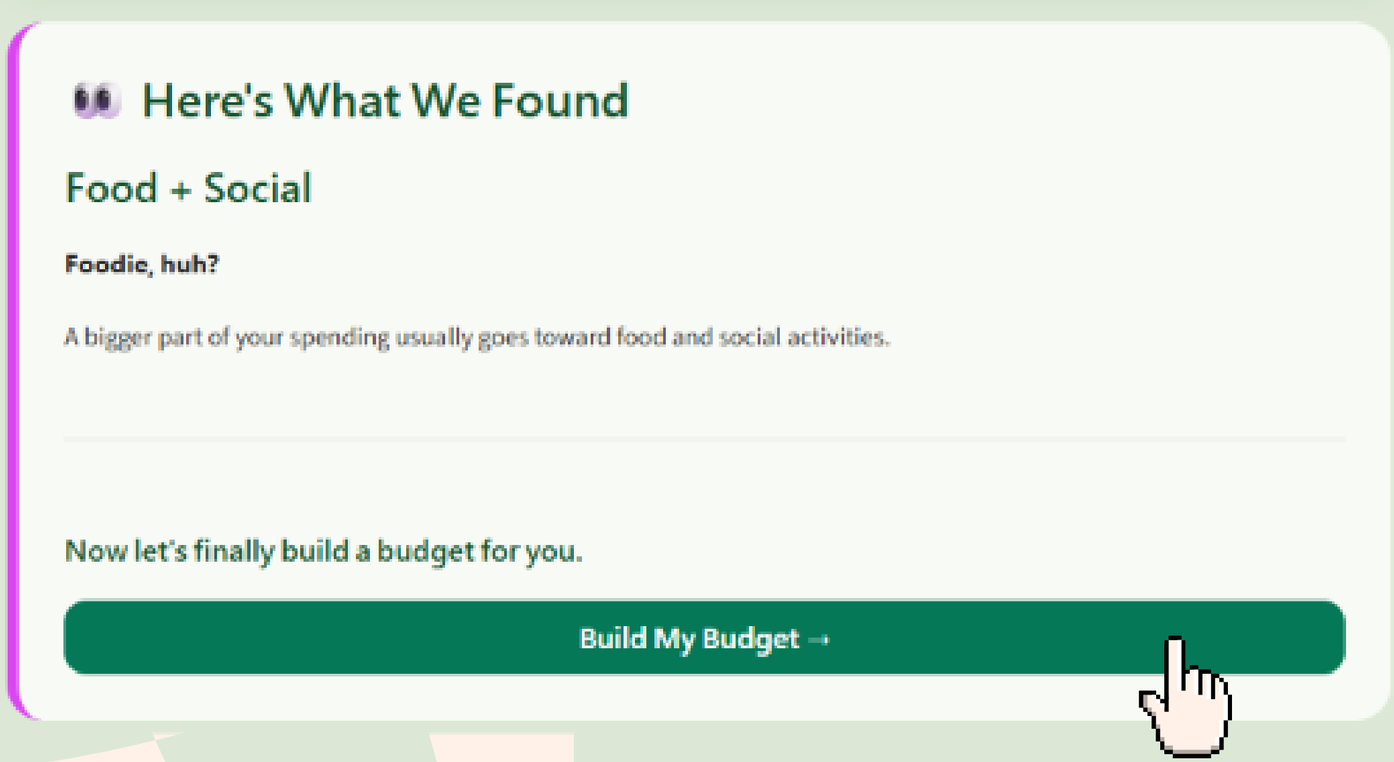

1. Enter an appropriate amount for each category.
2. Use your usual monthly spending or what you spent last month.
3. Enter ₹0 if a category does not apply.
4. Select Show Me My Spending Style →.

Important Note: The amounts should be realistic estimates of your usual spending.

SPENDING STYLE

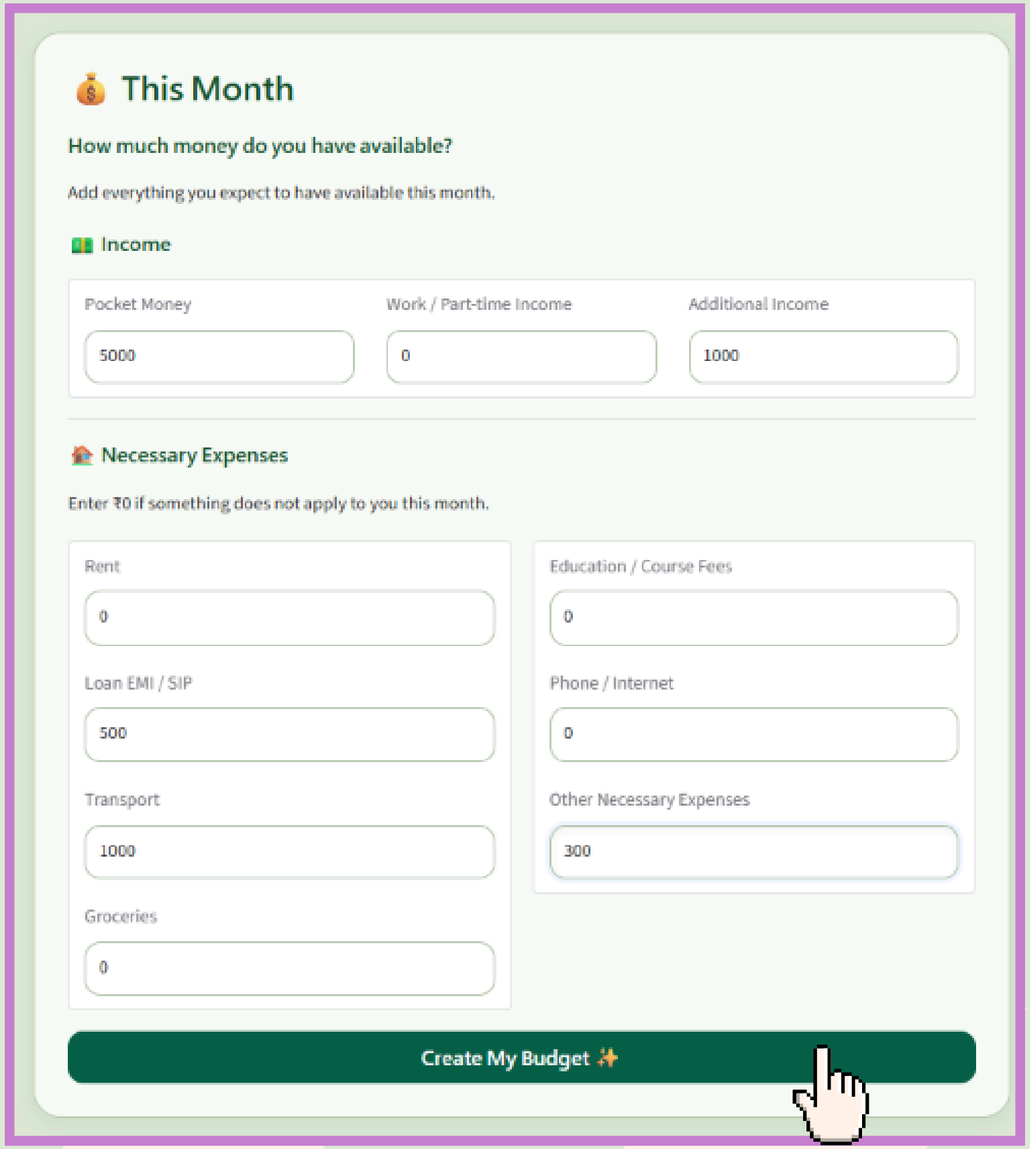

This screen shows the spending style identified from the information entered in the previous section.

Steps to use

1. Review the spending style shown on the screen.
2. Select Build My Budget → to continue.

THIS MONTH

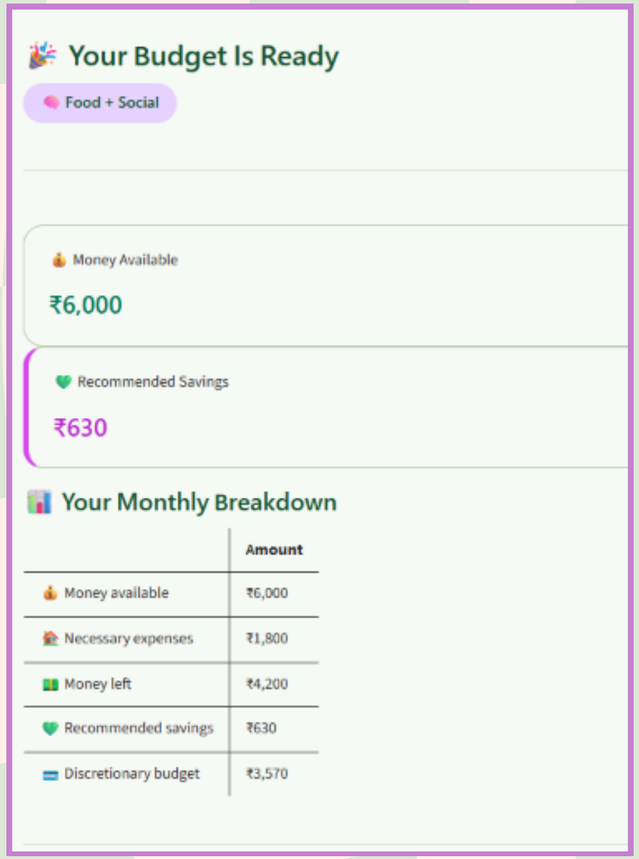

This section allows the user to enter the money they expect to have available during the current month and the necessary expenses they need to account for.

Steps to use

1. Enter the amount available from each income source.
2. Enter the necessary expenses for the month.
3. Enter ₹0 where something does not apply.
4. Select Create My Budget .

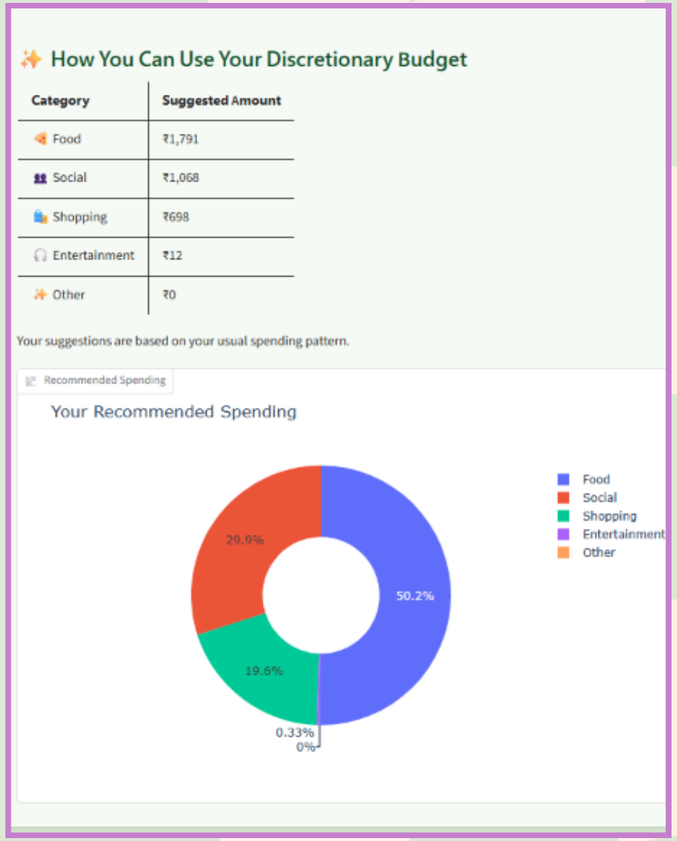

CREATE MY BUDGET

This screen displays the user's completed monthly budget.

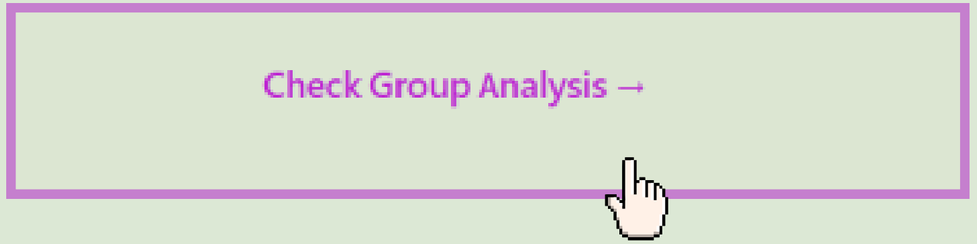

Steps to follow

1. Review the monthly budget summary.
2. Check the recommended savings amount.
3. Review the discretionary budget.
4. Check the suggested amount for each spending category.
5. Use the chart to view the spending distribution.

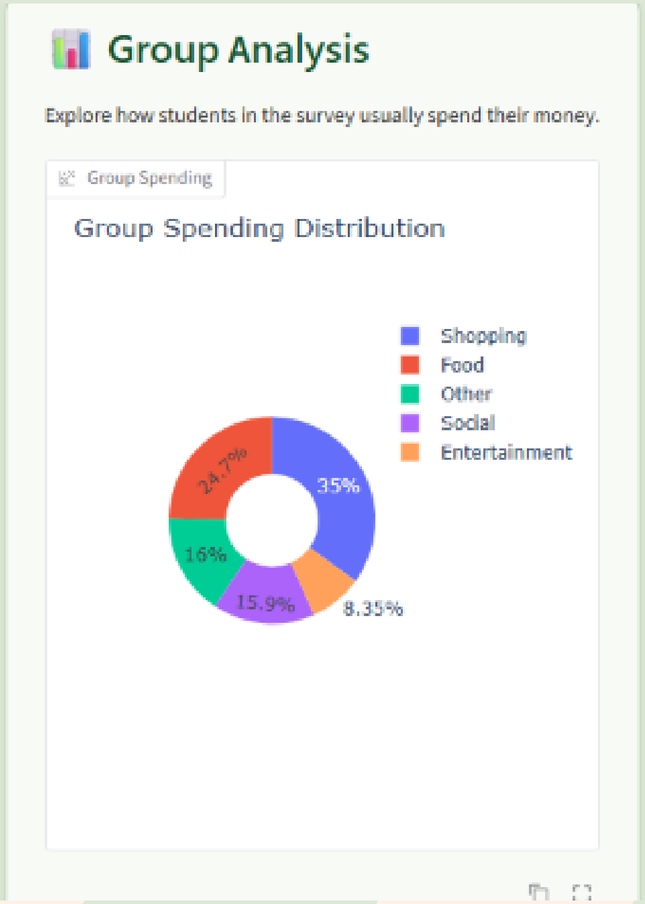

CHECK GROUP ANALYSIS

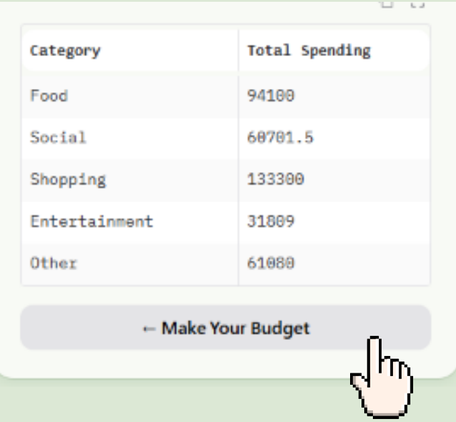

The Group Analysis screen provides an overall view of how people in the survey spend their money. It shows the percentage distribution across spending categories and the total spending recorded for each category.

Steps to follow

1. Select Check Group Analysis → from the main screen.
2. View the overall spending distribution of the survey group.
3. View the percentage of people spending across the different spending categories
4. To return to the main budgeting section, Select Make My Budget at the bottom of the Group Analysis screen.

Category	Total Spending
Food	94100
Social	60701.5
Shopping	133300
Entertainment	31809
Other	61080

.

IMPORTANT NOTES

- Enter non-negative amounts.
- If an income source or expense does not apply, enter ₹0.
- Enter realistic amounts for your usual spending.
- Necessary expenses should not be greater than the total money available for the month.
- The spending style is based on usual discretionary spending.
- If no money remains after necessary expenses, the app does not recommend discretionary spending or savings.
